HASIBUL HASSAN KOBIR

Aspiring Software Engineer | CSE Undergraduate (AI & Data Science)

Email: kobirmondol017@gmail.com | **Phone:** +880 1731-435152
Address: Dhaka, Bangladesh | GitHub | LinkedIn | Portfolio

CAREER OBJECTIVE

Computer Science and Engineering undergraduate majoring in Artificial Intelligence and Data Science, with hands-on experience building full-stack web applications using React.js, Node.js, Java and Spring Boot, along with machine learning projects. Seeking the Samsung R&D Institute Bangladesh internship to apply my problem-solving and programming skills to real-world software, learn from experienced engineers, and grow into a strong software professional.

SKILLS

Programming Languages: C, C++, Java, Python, JavaScript, TypeScript
Web Development: HTML, CSS, Tailwind CSS, React.js, Next.js, Node.js, Thymeleaf, Bootstrap
Backend & Database: Spring Boot, REST APIs, WebSocket, MySQL, MongoDB
Data Science & ML: Pandas, NumPy, Scikit-learn, NLP, Data Preprocessing, Exploratory Data Analysis
Tools: Git, GitHub, VS Code, Jupyter Notebook
AI Tools: Prompt Engineering, AI-Assisted Debugging, Rapid Prototyping with LLMs
Soft Skills: Teamwork, Communication, Quick Learning

PROJECTS

Machine Learning-Based Fraud Risk Assessment and Trust Analysis of Online Sellers | Final Year Design Project (Ongoing)
Machine learning system that estimates risk and assesses the trustworthiness of online seller pages.
Tech: Python, Pandas, Scikit-learn, NLP

- Anomaly detection with Isolation Forest to flag suspicious sellers
- NLP-based analysis of customer review and comment text
- Seller risk scores and risk levels to support user decisions

KoPassenger - Ride Cost-Sharing Platform
Platform concept that helps passengers share transportation expenses for common ride options.
Tech: HTML, CSS, TypeScript, JavaScript, React.js, Next.js, MongoDB

- Share ride costs among multiple passengers
- Clear, easy-to-understand cost split for every rider
- Safety features including instant SOS emergency trigger and gender-based ride filtering
- Verified user profiles and ride status updates

MyShop - E-commerce Application
Server-rendered e-commerce web app for browsing products and managing a shopping cart.
Tech: Java, Spring Boot, MySQL, Thymeleaf, Bootstrap

- Product browsing for customers
- Shopping cart functionality
- Real-time stock updates using WebSocket
- Server-rendered pages built with Thymeleaf and Bootstrap

EDUCATION

Bachelor of Science in Computer Science and Engineering | United International University, Dhaka
Jan 2023 - Early 2027 (Expected) | Major: Artificial Intelligence & Data Science | CGPA: 3.79
Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Software Engineering, Machine Learning, Data Mining, Artificial Intelligence
Scholarship: UIU Academic Merit Waivers (25% and 50% tuition waivers)

EXTRA-CURRICULAR ACTIVITIES

- 2nd Runner-Up, UIU System Analysis & Design Lab Competition, for designing and building KoPassenger

LANGUAGES

Bangla: Native | English: Professional Working Proficiency
